

Keya Chaudhary

Software Developer

chaudhary.keya18@gmail.com | +91 8830448501 | linkedin.com/in/keya-chaudhary | github.com/keya-05

Profile

Software Developer with a strong foundation in Data Structures, Algorithms, Object-Oriented Programming and backend development. Currently pursuing B.Tech in Computer Science (**CGPA: 9.26**). Skilled in SQL, Python and full-stack development with experience in building AI-Integrated applications, REST API, JavaScript and React. Passionate about problem-solving, software engineering, and continuously learning emerging technologies.

Education

Bachelors of Technology , MIT Arts Design and Technology, School of Computing (CGPA-9.26)	2023 – 2027
XII , The Orbis School, CBSE (88.4%)	2022 – 2023
X , The Orbis School, CBSE (92.4%)	2020 – 2021

Certificates

AWS Certified Cloud Practitioner — AWS

MLOps Tools: MLFlow and Hugging Face — Duke University | Coursera

Exam Prep (DEA-C01): AWS Certified Data Engineer - Associate — Coursera | AWS | Whizlab

Experience

Backend Intern, Hapticware Intelligence Pvt Ltd 06/2026 – Present

- Develop and maintain scalable server-side applications, collaborating closely with frontend and product teams to ensure seamless end-to-end feature delivery.
- Design and optimize RESTful APIs to improve system response times, database performance, and overall service reliability.
- Contribute to core system architecture decisions, assist in debugging production issues, and manage the deployment of backend services using AI-assisted workflows.
- Take ownership of full-cycle feature development, executing robust unit and integration testing to guarantee high-quality code

AI-ML Virtual Internship, Google for developers & AICTE 04/2025 – 06/2025

- Implemented model training, data preprocessing, and performance evaluation using TensorFlow and Keras.
- Built a supervised machine learning classification model to solve real-world predictive analysis challenges.

Projects

Sentiment Analysis from User feedback, React, Node.js, REST APIs, MySQL

- Architected a multi-tier application with decoupled frontend and backend services, integrating external LLM APIs for automated sentiment classification.
- Applied targeted prompt engineering techniques to drastically reduce model hallucination and improve response consistency.
- Designed optimized backend pipelines and database interactions for stable, large-scale user feedback processing.

Intelligent Order Management System, Model Context Protocol, REST APIs, React, Node.js, MYSQL

- Developed an NLP-driven middleware utilizing LangChain to translate natural language queries into optimized SQL execution plans.
- Engineered robust, fault-tolerant backend workflows with comprehensive unit and integration testing to ensure zero-downtime API execution.
- Utilized advanced AI evaluation tools (LangSmith, LMStudio) to debug LLM latency, reducing prompt hallucination and improving query accuracy.

ShopSphere — Full Stack E-Commerce Platform, React, Node.js, Express.js, MongoDB

- Developed a full-stack E-commerce application using the MERN stack with user authentication, product management, cart, and order processing functionalities.
- Designed and integrated RESTful APIs for user management, product catalog handling, and transaction workflows with efficient database interactions.
- Built a responsive React-based frontend and modular backend services for scalable application performance.

Technical Skills

Programming

C++, Java, Python, HTML, CSS, JavaScript

Frameworks

React, Node.js, Tensorflow, Flask, LangChain, LangGraph, OpenCV, SpringBoot

Fundamentals

Operating System, Data Structures and Algorithms, AWS Cloud Computing, Object Oriented Design, Software Engineering

Tools

VS Code, Git/GitHub, Postman, Google Colab, IntelliJ, LangSmith, LMStudio, Pino Logger

Databases

RDBMS(MySQL, PostgreSQL), NoSQL(MongoDB)

Soft Skills

Problem-Solving, Teamwork, Communication, Adaptability, Time Management, Leadership, Analytical Thinking
